

New PEP Campaign for STD Home Test Kits

August 1 – October 31, 2021

Radio and Television

The Alabama Department of Public Health has partnered with binx to provide free home test kits for residents of the state and any persons attending a college or university in the state.

Keywords: Communicable Disease, Prevention, STD

ABA PEP SUCCESSES

EMERGENCY BROADBAND BENEFIT

[CLICK FOR SPOT](#)

Through the Emergency Broadband Benefit program, Heartland Forward, the FCC, and state and local partners are raising awareness about the federal Emergency Broadband Benefit to help close the digital divide by offering discounts on internet service for families trying to get connected during the pandemic.

ABA PEP SUCCESSES

METHODIST FAMILY HEALTH

Methodist Family Health manages the Methodist Children's Home, Methodist Behavioral Hospital, Methodist Counseling Clinics and Arkansas CARES (Center for Addictions Research, Education and Services). They also offer acute psychiatric hospital care, outpatient counseling, and intermediate residential level care.

CARELINK

[CLICK FOR SPOT](#)

CareLink, is a nonprofit agency that exists to meet the needs of homebound older people, active older people, and family caregivers in central Arkansas. They also provide information and resources to active older people who want to stay healthy and involved, as well as family caregivers who need to navigate the maze of services available for their loved ones.

PEP Partner: Propane Marketers Association of Kansas

Timeframe: \$30,000 for 6 months with \$20,000 two-month extension

Description: The Propane Marketers Association is utilizing the KAB PEP program to promote....

Propane System Safety (Dec.-May)

Spot encourages inspection by a qualified service technician. Propane suppliers are required to check to ensure systems are leak free and safe.

Summer Safety (June-July)

Outdoor propane grill safety tips and instructions. Keep children and pets away. Ensure grill is on solid surface, that it is five feet away from combustibles. Open grill lid before lighting, don't grill inside, never leave grill unattended.

PMAK strives to increase the effectiveness of propane service for the mutual benefit of the producers, distributors and users of propane; advance the methods of distribution and utilization employed in the propane industry to the highest efficiency; advance knowledge through research, invention and market development; and to cooperate with other organizations in efforts toward economic advancement, accident prevention, conservation, standardization and other activities.
